

iVIEW

SOFTWARE SOFTWARE

Software iVIEW for lockers

The software is for monitoring and remote supervision of the facility lockers, thus knowing real time the locker occupancy (free or occupied) and by which user.

It informs about the locker usage data: opening/locking time, users occupying it and act according to possible incidences.

ENKOA locking solution is the best for:

- Wellness, spa, thalassotherapy, sport centres, ski stations, golf clubs.
- Corporate offices, hospitals, universities, government buildings.
